

1ST Revel Custom Wine Cellars

The Fijian mahogany wine cellar cabinetry components and the cellar entry door were designed and manufactured by the custom wine cellar builder, and the ceiling and wall treatments, countertop, and flooring were chosen by the interior designer. A dramatic, gracefully arched expanse of low-E insulated, tempered glass affords a striking view into the richly appointed wine cellar, which can store more than 1,300 bottles. Two floor-to-ceiling wine wheel towers anchor the back wall of the cellar, which is flanked by sliding pull-out drawers for individual bottles and case storage.

Judge's Insights

The Revel Custom Wine Cellars project — with its Fijian mahogany cabinetry— is rich and appealing.”
